**Tip of the Month:** Ethan S

Talked about the Free Rig and how to use it

(What he used at Chickamauga)

- Use a tear drop weight which slides freely along the line above the hook, when weight hits bottom the lure freely falls behind. Bites generally happen on the fall so you need to watch your line for any movement.

- Shallow 1/8-1/4oz Deep 3/8-1/2oz

He also sent out a power point with all the information discussed at meeting.

See everyone at the ramp on Saturday morning.
